Subject: Great Job !!

Mike

I wanted to drop a quick note to you and your crew to say "Thanks".

From the moment I met Joel I knew I had chosen the right company. The professionalism and knowledge were incredible. I had a list of questions to ask, given to me by a co-worker and they were all addressed even before I had to ask. I received a temporary repair to get me through until the materials were available and the job was complete, all within days.

The guy's were very pleasant, did a nice job and you'd never know they had been here....NO mess!

Feel free to use this e-mail and my name for future business quotes.

I will definitely recommend your work to others.

We were told that some metal flashing had to be installed, can you recommend anyone?
